## CONNECTIONS

## CONNECTIONS

### ■ SYSTEM EXAMPLES

When the Mode switch is set to "MONO" the output of that channel becomes monaural and the output is doubled.  
With this function, various system can be made.  
The examples are as follows. With these examples, both Mode switches should be set to "MONO".  
**NOTE:** With this system, the LEFT side is for inputs.

### ■ CONNECTION PROCEDURES

1. Before installation and wiring, remove the (-) terminal of the battery to prevent short-circuiting.
2. Connect the input and output cords of the system.
3. Connect the ground to the metal chassis of the car.
4. Connect the power supply lead.
5. Install the set and after confirming the installation and wirings are correct, connect the (-) terminal of the battery.

### ■ USE OF THE OPERATION PANEL ACCORDING TO SYSTEM TYPE

#### • Input sensitivity control

The input sensitivity control adjusts the input sensitivity within a range of 0.1 V to 5.0 V continuously, enabling expansion with various systems.

This unit has been set for 0.3 V.

★ The left input sensitivity controller is for A and right for B.

KENWOOD head unit preout level (MAX.)	Amplifier input sensitivity
300 mV	0.1 V
1 V	0.3 ~ 0.5 V

KAC-642

#### • Mode switch

When this switch is set to "MONO", the output of that channel becomes monaural and the output is doubled.

★ The left MODE switch is for A and right for B.

### INSTALLATION

#### 1. Installation

#### 2. Installation location

- Since the power amplifier has no parts which require operation, it can be installed at a position away from the driver's seat without any hindrances. As generally accepted positions for its installation, places such as inside the trunk, etc. can be considered.
- Use the extension cables. (Optional)

	0.5 m	1 m	2 m	4 m	6 m
RCA φ11.5	CA-5W	CA-15W	CA-25W	CA-45W	CA-65W
φ8	CA-3W	CA-13W	CA-23W	CA-43W	CA-63W

### CONSTANT TABLE OF NETWORK FOR TRI MODE

You can construct a multiple speaker system through the use of passive crossovers (coils and capacitors) as shown below: (if the coils and capacitors are not available in the values listed, coils and capacitors with similar or close values can be used without affecting the performance in practical use.)

#### ■ 6 dB/Octave for High and Low pass Filter

Table of content for 6 dB (4 Ohm)

Cross-over Frequency	L (Coil)	C (Capacitor)
30Hz	21.2mH	1330μF
50Hz	12.7mH	800μF
80Hz	8.0mH	500μF
100Hz	6.4mH	400μF
150Hz	4.2mH	270μF
200Hz	3.2mH	200μF
260Hz	2.4mH	150μF
400Hz	1.6mH	100μF
600Hz	1.1mH	70μF
800Hz	0.8mH	50μF

#### ■ 6 dB/Octave w/Sub Woofer and Full Range Speakers

When using a 2 ohm speaker, use half the value of the coil for low pass and use twice the value of the capacitor for high pass. Example: 30 Hz L = 10.6 mH, C = 2660 μF  
When using a 8 ohm speaker, use twice the value of the coil for low pass and use half the value of the capacitor for high pass. Example: 30 Hz L = 42.4 mH, C = 665 μF

#### ■ 12 dB/Octave for High and Low pass Filter

##### • Functions of a High Pass filter

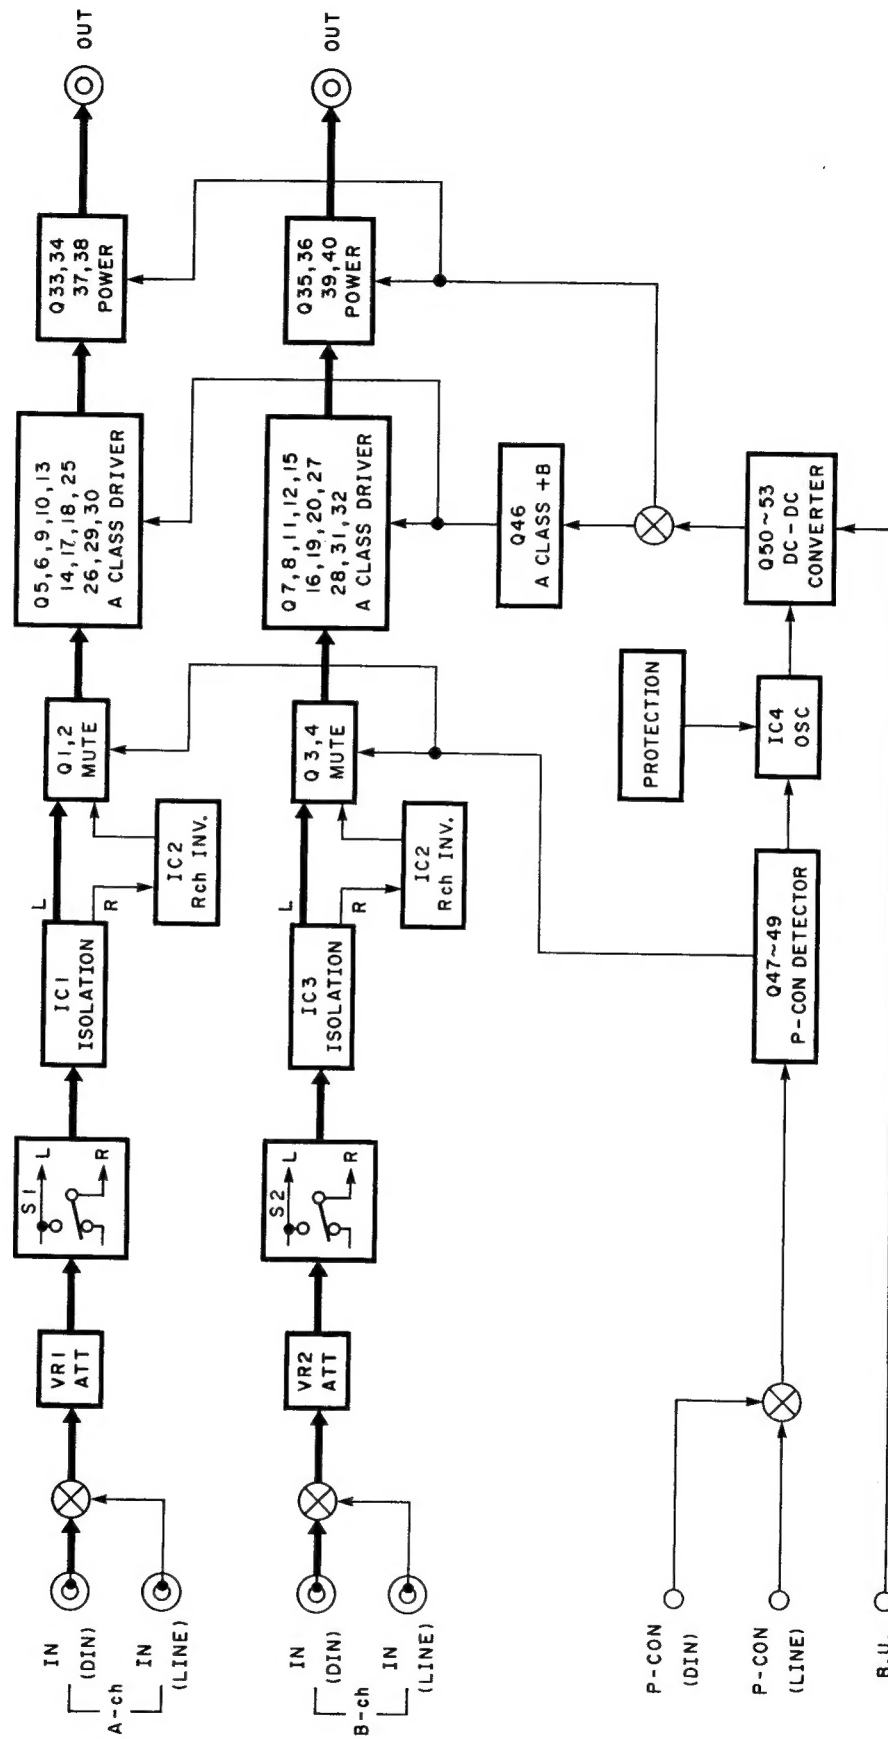

##### • 12 dB/Octave w/Sub Woofer and Full Range Speakers

When using a 2 ohm speaker, use half the value of the coil for low pass and use twice the value of the capacitor for high pass. Example: 30 Hz L = 14.9 mH, C = 1900 μF  
When using a 8 ohm speaker, use twice the value of the coil for low pass and use half the value of the capacitor for high pass. Example: 30 Hz L = 59.4 mH, C = 475 μF

## CIRCUIT DESCRIPTION

### AUDIO UNIT (X09-340X-XX)

Ref. No.	Use/Function	Operation/Condition/Compatibility
IC1, 3	G-isolation	
IC2	R CH inversion stage	General-purpose SIP opamp.
D1-8	Latch up prevention	General-purpose diodes.
D13, 14, 15	Constant-voltage Zener diodes	
D16	P-CON OFF shock noise	
Q21 ~ 24	Idle current	
Q25 ~ 32	Driver	
Q33 ~ 40	Output stage	
Q41 ~ 44	Current protection	Detection transistors.
D9 ~ 12	Current protection	Reverse bias shaping.
D28	LED	
D25	P-CON sensitivity	
D24	Inverse connection protection	
D27	- B current	
Q50 ~ 53	DC-DC converter	
Q1 ~ 4	Muting transistors	

### SUB-CIRCUIT UNIT (X13-6850-10)

Ref. No.	Use/Function	Operation/Condition/Compatibility
Q5 ~ 20	Power amp differentiation stage	
Q45	Muting driver	
Q46	Class A slow starter	
Q47	P-CON OFF, quick release	
Q48, 49	+ B SW	
D28	Muting power supply	
D17 ~ 21	Logic circuit	
IC4	DC-DC OSC, controller	
D22	Reverse current stopping

**CAUTION:** For continued safety, replace safety critical components only with manufacturer's recommended parts (refer to parts list).  Indicates safety critical components. To reduce the risk of electric shock, leakage-current or resistance measurements shall be carried out (exposed parts are acceptably insulated from the supply circuit) before the appliance is returned to the customer.

## PACKING

\* Refer to parts list on page 19.

# SPECIFICATIONS

Specifications subject to change without notice.

## Audio Section

|                                  |                                                                         |
|----------------------------------|-------------------------------------------------------------------------|
| Max Power Output [4 $\Omega$ ]   |                                                                         |
| 4 Channel Mode .....             | 40 W $\times$ 4                                                         |
| 3 Channel Mode .....             | 40 W $\times$ 2 + 90 W                                                  |
| 2 Channel Mode .....             | 90 W $\times$ 2                                                         |
| Rated Power Output [4 $\Omega$ ] |                                                                         |
| 4 Channel Mode .....             | 16 W $\times$ 4 (20 Hz ~ 20 kHz, less than 0.08% THD)                   |
| 3 Channel Mode .....             | 16 W $\times$ 2 (20 Hz ~ 20 kHz, 0.08%) + 45 W $\times$ 1 (1 kHz, 0.8%) |
| 2 Channel Mode .....             | 45 W $\times$ 2 (1 kHz, 0.8% THD)                                       |
| Rated Power Output [2 $\Omega$ ] |                                                                         |
| 4 Channel Mode .....             | 25 W $\times$ 4 (1 kHz, 0.8% THD)                                       |
| Frequency Response .....         | 6 Hz ~ 65 kHz ( - 3 dB)                                                 |
| Signal to Noise Ratio .....      | 100 dB                                                                  |
| Sensitivity (MAX) .....          | 0.1 V (rated output)                                                    |
| Sensitivity (MIN) .....          | 5.0 V (rated output)                                                    |
| Input Impedance .....            | 10 k $\Omega$                                                           |
| Damping Factor (100 Hz) .....    | More than 100                                                           |

## General

|                                            |                                                                                 |
|--------------------------------------------|---------------------------------------------------------------------------------|
| Operating Voltage .....                    | 14.4 V (11 ~ 16 V allowable)                                                    |
| Current Consumption (1 kHz, 10% THD) ..... | 16 A                                                                            |
| Dimensions (W $\times$ H $\times$ D) ..... | 220 $\times$ 48 $\times$ 185 mm<br>(8-11/16 $\times$ 1-7/8 $\times$ 7-5/16 in.) |
| Weight .....                               | 2.1 kg (4.6 lb)                                                                 |
